

Welcome to the Journal of Case Reports and Series

Varshil Mehta SevenHills Hospital, Mumbai, India.

Editorial

I am extremely delighted to share the news of an inception of a new journal dedicated to case reports and series under the banner of MedkruX which shall be an open access and peer reviewed journal. The Journal of Case Reports and Series (JCRS) shall be published annually, with a provision of publishing each and every article as soon as it is accepted, assigned with a doi.

After the successful two years of journey and launch of first issue of third volume of Journal of Medical Research and Innovation (JMRI), we got many compliments and suggestions that we should start an open access journal dedicated to cases reports and series [1]. Thus, JCRS is the result of those requests. It shall be a complementary to its sister journal and we hope, that we can even take further the legacy of JMRI through Journal of Case Reports and Series.
